ON-LINE FIG 1. Segmentation of volume plots versus patient age. A, ICV. B, BPV. C, GM. D, WM. E, BPF. F, CSF. G, MY. H, MYF. Data points for the 122 healthy patients are denoted by black dots. Solid lines denote curve fit functions. Dashed lines denote 95% confidence intervals.
ON-LINE FIG 1. Continued.
ON-LINE FIG 2. MY (A) and MYF (B) segmentation volume plots versus patient age from 0 to 18 months. Data points for the 12 healthy patients 0–18 months of age are denoted by black dots. Solid lines denote curve fit functions. Dashed lines denote 95% confidence intervals.
